INTRODUCTION

Volume II of the Import Commodity Classification is designed primarily for the use of the staffs concerned with the accuracy of Canada's import statistics. It lists in numeric order the English descriptions of all import commodity classes as they appear in monthly and quarterly trade reports, and shows after each class description the "office rulings" on commodity descriptions not specifically mentioned in the commodity classes but frequently encountered on customs import documents. It therefore provides a useful guide to the probable main components of any import commodity class. Because it is a working document, its content is continually changing, and it is therefore printed in loose-leaf form to facilitate revisions to individual pages as required.

This volume makes no attempt to provide a complete list of the contents of each import commodity class. Such a list would be too unwieldy for daily use. Nor are the rulings it contains designed to be self-sufficient; each ruling must be read in the context of the full class description and notes contained in Volume I of the Import Commodity Classification (DBS Cat. No. 12-524). Finally, it is not designed to help users find the class in which particular commodities are included; that purpose is better served by Volume III of the Import Commodity Classification (DBS Cat. No. 12-526) which presents the same material arranged in alphabetic order.

All office rulings (including commodity class descriptions) are kept on punch cards to aid in making revisions and in controlling their accuracy and adequacy. This volume has been printed from copy prepared by listing these punch cards, which has imposed certain important limitations on the phrasing, punctuation and format which are used. The most important limitation is that of length: all class descriptions and most rulings are confined to one descriptive line not exceeding 35 characters in length (including all blank spaces, but not including the class code or unit of quantity). Because of this limitation there is extensive use of abbreviations, and this volume must be read carefully if users are to avoid being misled by these abbreviations. When the meaning of a ruling could not be expressed in one line even with abbreviations, a second line of not more than 31 characters was added. In these cases the second descriptive line is identified by a 4-letter indentation.

This volume is divided into two sections. The first section or "preamble" is brief (9 pages) and has two parts:

The first part contains items which provide:

- (a) general guides to the classification of broad categories of goods
(e.g.: BERYLLIUM COPPER IS A COPPER ALLOY.)
- (b) definitions of common abbreviations used in this volume
(e.g.: FAB IS AN ABBREVIATION FOR FABRICS.)
- (c) warnings against basing a commodity classification decision on a term known to apply to more than one class of commodity
(e.g.: IGEPON IS A GENERAL TRADE NAME)

These items do not show a commodity code, and are arranged in alphabetic order.

The second part contains also in alphabetic order those group descriptions which are included in Volume III, the Alphabetic Index, in order to assist in locating groups (or sub-groups) of commodities often thought of as collective units or important in the structure of the classification. They show the group code, and may contain a unit of quantity (where all classes in the group have the same unit), or a dash (where no classes take a quantity), or a blank in the quantity column (where there is no common standard within the group). Leader dots link the description and its unit of quantity.

The balance of this volume presents the import class descriptions and specific commodity rulings arranged in numeric order, and by alphabetic order within each class. The first item shown for any class is the class description, while additional items for any class are specific commodity rulings. These items have the following characteristics:

1. Class descriptions: these consist of one descriptive line of up to 35 characters, a unit of quantity (or a blank if the class does not record quantity), and a class code. They do not have leader dots, and are further identified by the symbol □ preceding the description. In some cases class descriptions are sufficiently specific to make rulings on these classes unnecessary, but in other cases rulings are required to indicate the main commodities falling within given classes.
2. Specific commodity rulings: these consist of a 35 character description, occasionally supplemented by a second descriptive line of up to 31 characters, a unit of quantity (or a dash if goods which would be governed by a specific ruling are recorded without a quantity), and a class code. Leader dots link the ruling and its unit of quantity. The specific commodity rulings account for the vast majority of items in this volume.

Note that some rulings to certain classes specify a unit of quantity, while other rulings to the same classes show a dash in the quantity column. This will occur whenever a class takes both complete units and parts of units; rulings on complete units will usually specify a quantity (commonly "number"), while "parts" rulings will show a dash because parts are recorded without quantities.

Some class descriptions are preceded by the symbol # instead of □; an extra digit follows the class number for these class descriptions and for all rulings relating to these classes. Statistics on commodities so identified are not available except to employees of the Dominion Bureau of Statistics. In all available published records such classes are combined with the most appropriate general class within the same commodity group (e.g.: class 423-99-3 is included with 423-99, class 429-99-3 with 429-99, etc.).

This volume makes extensive use of abbreviations because of the need to limit most descriptions to 35 characters. Some are standard dictionary abbreviations, some are terms widely used in industry, and some have been tailored to the specific needs of this volume by such devices as the omission of vowels or the omission of terminal syllables. There is no complete list of the abbreviations used, more than one abbreviation may be used for the same word or phrase, and one abbreviation sometimes has two different meanings. The following examples define some of the more common abbreviations and illustrate the lack of uniformity:

(1) To describe steel:

| | |
|---|----------------------|
| AS ... alloy steel | CD ... cold drawn |
| CS ... carbon steel | CF ... cold finished |
| SS ... stainless steel (where distinguished from other alloy steel) | CR ... cold rolled |
| | HR ... hot rolled |

(2) To describe textile fibres, textiles and textile products:

| | |
|-------------------|------------------------------|
| BL ... bleached | M-M) ... man-made |
| COT ... cotton | MAN-MD) ... man-made |
| FAB ... fabrics | WOV ... woven or broad woven |
| KNIT) ... knitted | WOV NAR ... narrow woven |
| KNTD) ... knitted | |

(3) Miscellaneous:

| | |
|-----------------------|----------------------|
| ELEC ... electric(al) | MAT ... materials |
| EXC ... except | PLAST ... plastic |
| INCL ... including | PROD ... products |
| IND ... industry | PT) ... parts |
| INDUST ... industrial | PTS) ... parts |
| MACH ... machine(s) | SYN ... synthetic |
| MACHY) ... machinery | T.I. ... tariff item |
| MCHY) ... machinery | |

Units of Quantity: In preparing the import commodity classification, a systematic effort was made to select units of quantity which could readily be reported, which could be made uniform in import and export statistics, and which would not conflict with units which must be shown on customs documents for tariff purposes. As far as possible uniform units of quantity are used in each group of the classification to facilitate mechanical methods of tabulation, and also for goods imported under any tariff item to facilitate reporting. Weight and number are the most commonly used units since one or both of these is normally available for any import shipment, but in some cases measures of volume, area or length are used to conform with prevailing industrial practice or the tariff. Generally, weight is the most common measure of quantity in Sections II, III and IV of the classification, number in Sections I and V.

Producers and processors of canned foods have recommended that quantity statistics for these commodities should be in terms of "net weight", i.e. that the weight of all containers, including the cans, should be omitted and only the weight of the contents of the cans shown. This classification attempts to follow that recommendation for all classes which consists entirely of canned products.

Throughout the import commodity classification the term "canned" means preserved solely by being shut off from contact with air. It therefore includes all food preserved by hermetically sealed containers, whether these be made of metal, of glass or of other materials, and also food packed in plastic wrappings and preserved solely by sealing against penetration by air. It does not include frozen foods regardless of the use of hermetically sealed containers, since frozen foods are preserved primarily by being frozen rather than by being shut off from contact with air. Likewise foods wrapped and sealed in plastic materials but which must be kept under refrigeration are not included as "canned".

ABBREVIATIONS, DEFINITIONS AND UNITS OF QUANTITY USED IN CANADIAN IMPORT STATISTICS

| | |
|-------------------------------|--|
| Bbl. | Volume in barrels, for petroleum, 35 Canadian gallons or 42 U.S. gallons |
| Broad woven ... | More than 12 inches in width. |
| Canned | Preserved solely by being shut off from air. |
| Carat | Weight in carats. |
| Cord | Volume in cords. |
| Cwt. | Weight in hundredweights of 100 lb. each. |
| Cwt. N. | For canned foods, weight of contents of cans in hundredweights of 100 lb. each, the weight of all containers and packing being excluded. |
| Doz. | Number of dozens. |
| Doz. Pr.) Dz. Pr.) | Number of pairs in dozens. |
| Ft. | Length in linear feet. |
| Gal. | Volume in Canadian gallons (1 U.S. gal. = 0.83 Can. gal.). |
| Gross | Number in gross. |
| Hardwood | Wood from broad-leaved trees. |
| Kg. | Weight in kilograms (1 Kg. = 2.2 lb.). |
| Lb. | Weight in pounds. |
| Lb. N. | For canned foods, weight of contents of cans in pounds, the weight of all containers and packing being excluded. |
| M. | Number in thousands. |
| M. B. Ft.) M. B. F.) | Volume in thousand board feet. |
| M. Cu. Ft.) M. C. F.) ... | Volume in thousand cubic feet. |
| M. Kw. H. | Thousand kilowatt hours. |

| | |
|-------------------------|---|
| Narrow woven ... | Not more than 12 inches in width. |
| N. E. S. | Not elsewhere specified. |
| No. | Number. |
| Oz. | Weight in ounces. |
| Pack | Number of packs. |
| Pair | Number of pairs. |
| P. Gal. | Volume of alcoholic content in terms of Canadian gallons of the strength of proof (1 U.S. P.gal. = 0.74 Can. P.gal.). |
| Pkg. | Number of packages. |
| Softwood | Wood from coniferous trees. |
| Sq. Ft. | Area in square feet. |
| Sq. Ft. 3/8" equiv.) | Volume in square feet of 3/8" thickness, other thicknesses to be converted to the equivalent of 3/8" thickness (e.g. 10,000 sq.ft. of 3/16" plywood = 5,000 sq.ft. of 3/8" equivalent). |
|) | |
| SF3/8) | |
| Sq. Yd. | Area in square yards. |
| Ton | Weight in short tons of 2,000 lb. each: 1 long ton = 1.12 short tons or 2,240 lb. 1 metric ton = 1.1 short tons or 2,205 lb. |
| Tr. Oz. | Weight in troy ounces. |
| - | In Unit of Quantity Column: no quantity recorded. |
| □ | Precedes each class description card to distinguish class descriptions from rulings. |
| # | Statistics on this class not available except to employees of DBS. |

UNITS OF QUANTITY USED IN THE FRENCH CLASS DESCRIPTIONS

| | |
|-------------|---|
| BRL | Volume en barils. |
| CARAT | Poids en carats. |
| CORDE | Volume en cordes. |
| DOUZ | Nombre de douzaines. |
| D PRE | Nombre de douzaines de paires. |
| GALL | Volume en gallons canadiens. |
| GAL P | Volume du contenu alcoolisé en gallons canadiens de preuve. |
| GR | Nombre de grosses. |
| KILO | Poids en kilomètres. |
| LIV | Poids en livres. |
| LIV N | Poids du contenu en livres (récipients exclus). |
| M | Nombre en milliers. |
| M KWH | Milliers de kilowatts-heure. |
| M PCU | Volume en milliers de pieds cubes. |
| M P P | Volume en milliers de pieds planche. |
| NOMB | Nombre. |
| ONCE | Poids en onces. |
| OT TR | Poids en onces troy. |
| PAQ | Nombre de paquets. |
| PAIRE | Nombre de paires. |
| PC3/8 | Volume en pieds carrés de 3/8 de pouce d'épaisseur. |
| PI | Longueur en pieds linéaires. |
| PI CA | Superficie en pieds carrés. |

UNITS OF QUANTITY USED IN THE FRENCH CLASS DESCRIPTIONS (Concluded)

| | |
|-------------|--|
| QTL | Nombre en quintal en poids de 100 livres. |
| QTL N | Poids du contenu en quintal de 100 livres (récipients exclus). |
| TONNE | Poids en tonnes courtes de 2,000 livres. |
| VG CA | Superficie en verges carrées. |

INTRODUCTION

Volume II of the Import Commodity Classification is designed primarily for the use of the staffs concerned with the accuracy of Canada's import statistics. It lists in numeric order the English descriptions of all import commodity classes as they appear in monthly and quarterly trade reports, and shows after each class description the "office rulings" on commodity descriptions not specifically mentioned in the commodity classes but frequently encountered on customs import documents. It therefore provides a useful guide to the probable main components of any import commodity class. Because it is a working document, its content is continually changing, and it is therefore printed in loose-leaf form to facilitate revisions to individual pages as required.

This volume makes no attempt to provide a complete list of the contents of each import commodity class. Such a list would be too unwieldy for daily use. Nor are the rulings it contains designed to be self-sufficient; each ruling must be read in the context of the full class description and notes contained in Volume I of the Import Commodity Classification (Catalogue No. 12-524). Finally, it is not designed to help users find the class in which particular commodities are included; that purpose is better served by Volume III of the Import Commodity Classification (Catalogue No. 12-526) which presents the same material arranged in alphabetic order.

All office rulings (including commodity class descriptions) are kept on punch cards to aid in making revisions and in controlling their accuracy and adequacy. This volume has been printed from copy prepared by listing these punch cards, which has imposed certain important limitations on the phrasing, punctuation and format which are used. The most important limitation is that of length: all class descriptions and most rulings are confined to one descriptive line not exceeding 35 characters in length (including all blank spaces, but not including the class code or unit of quantity). Because of this limitation there is extensive use of abbreviations, and this volume must be read carefully if users are to avoid being misled by these abbreviations. When the meaning of a ruling could not be expressed in one line even with abbreviations, a second line of not more than 31 characters was added. In these cases the second descriptive line is identified by a 4-letter indentation.

This volume is divided into two sections. The first section or "preamble" is brief (9 pages) and has two parts:

The first part contains items which provide:

- (a) general guides to the classification of broad categories of goods
(e.g.: BERYLLIUM COPPER IS A COPPER ALLOY.)
- (b) definitions of common abbreviations used in this volume
(e.g.: FAB IS AN ABBREVIATION FOR FABRICS.)
- (c) warnings against basing a commodity classification decision on a term known to apply to more than one class of commodity
(e.g.: IGEPON IS A GENERAL TRADE NAME)

These items do not show a commodity code, and are arranged in alphabetic order.

The second part contains also in alphabetic order those group descriptions which are included in Volume III, the Alphabetic Index, in order to assist in locating groups (or sub-groups) of commodities often thought of as collective units or important in the structure of the classification. They show the group code, and may contain a unit of quantity (where all classes in the group have the same unit), or a dash (where no classes take a quantity), or a blank in the quantity column (where there is no common standard within the group). Leader dots link the description and its unit of quantity.

The balance of this volume presents the import class descriptions and specific commodity rulings arranged in numeric order, and by alphabetic order within each class. The first item shown for any class is the class description, while additional items for any class are specific commodity rulings. These items have the following characteristics:

1. Class descriptions: these consist of one descriptive line of up to 35 characters, a unit of quantity (or a blank if the class does not record quantity), and a class code. They do not have leader dots, and are further identified by the symbol \square preceding the description. In some cases class descriptions are sufficiently specific to make rulings on these classes unnecessary, but in other cases rulings are required to indicate the main commodities falling within given classes.
2. Specific commodity rulings: these consist of a 35 character description, occasionally supplemented by a second descriptive line of up to 31 characters, a unit of quantity (or a dash if goods which would be governed by a specific ruling are recorded without a quantity), and a class code. Leader dots link the ruling and its unit of quantity. The specific commodity rulings account for the vast majority of items in this volume.

Note that some rulings to certain classes specify a unit of quantity, while other rulings to the same classes show a dash in the quantity column. This will occur whenever a class takes both complete units and parts of units; rulings on complete units will usually specify a quantity (commonly "number"), while "parts" rulings will show a dash because parts are recorded without quantities.

Some class descriptions are preceded by the symbol # instead of \square ; an extra digit follows the class number for these class descriptions and for all rulings relating to these classes. Statistics on commodities so identified are not available except to employees of the Dominion Bureau of Statistics. In all available published records such classes are combined with the most appropriate general class within the same commodity group (e.g.: class 423-99-3 is included with 423-99, class 429-99-3 with 429-99, etc.).

This volume makes extensive use of abbreviations because of the need to limit most descriptions to 35 characters. Some are standard dictionary abbreviations, some are terms widely used in industry, and some have been tailored to the specific needs of this volume by such devices as the omission of vowels or the omission of terminal syllables. There is no complete list of the abbreviations used, more than one abbreviation may be used for the same word or phrase, and one abbreviation sometimes has two different meanings. The following examples define some of the more common abbreviations and illustrate the lack of uniformity:

(1) To describe steel:

| | |
|---|----------------------|
| AS ... alloy steel | CD ... cold drawn |
| CS ... carbon steel | CF ... cold finished |
| SS ... stainless steel (where distinguished from other alloy steel) | CR ... cold rolled |
| | HR ... hot rolled |

(2) To describe textile fibres, textiles and textile products:

| | |
|-------------------|------------------------------|
| BL ... bleached | M-M) ... man-made |
| COT ... cotton | MAN-MD) ... man-made |
| FAB ... fabrics | WOV ... woven or broad woven |
| KNIT) ... knitted | WOV NAR ... narrow woven |
| KNTD) | |

(3) Miscellaneous:

| | |
|-----------------------|----------------------|
| ELEC ... electric(al) | MAT ... materials |
| EXC ... except | PLAST ... plastic |
| INCL ... including | PROD ... products |
| IND ... industry | PT) ... parts |
| INDUST ... industrial | PTS) ... parts |
| MACH ... machine(s) | SYN ... synthetic |
| MACHY) ... machinery | T.I. ... tariff item |
| MCHY) | |

Units of Quantity: In preparing the import commodity classification, a systematic effort was made to select units of quantity which could readily be reported, which could be made uniform in import and export statistics, and which would not conflict with units which must be shown on customs documents for tariff purposes. As far as possible uniform units of quantity are used in each group of the classification to facilitate mechanical methods of tabulation, and also for goods imported under any tariff item to facilitate reporting. Weight and number are the most commonly used units since one or both of these is normally available for any import shipment, but in some cases measures of volume, area or length are used to conform with prevailing industrial practice or the tariff. Generally, weight is the most common measure of quantity in Sections II, III and IV of the classification, number in Sections I and V.

Producers and processors of canned foods have recommended that quantity statistics for these commodities should be in terms of "net weight", i.e. that the weight of all containers, including the cans, should be omitted and only the weight of the contents of the cans shown. This classification attempts to follow that recommendation for all classes which consists entirely of canned products.

Throughout the import commodity classification the term "canned" means preserved solely by being shut off from contact with air. It therefore includes all food preserved by hermetically sealed containers, whether these be made of metal, of glass or of other materials, and also food packed in plastic wrappings and preserved solely by sealing against penetration by air. It does not include frozen foods regardless of the use of hermetically sealed containers, since frozen foods are preserved primarily by being frozen rather than by being shut off from contact with air. Likewise foods wrapped and sealed in plastic materials but which must be kept under refrigeration are not included as "canned".

ABBREVIATIONS, DEFINITIONS AND UNITS OF QUANTITY USED IN CANADIAN IMPORT STATISTICS

| | |
|-------------------------------|--|
| Bbl. | Volume in barrels, for petroleum, 35 Canadian gallons or 42 U.S. gallons. |
| Broad woven ... | More than 12 inches in width. |
| Canned | Preserved solely by being shut off from air. |
| Carat | Weight in carats. |
| Cord | Volume in cords. |
| Cwt. | Weight in hundredweights of 100 lb. each. |
| Cwt. N. | For canned foods, weight of contents of cans in hundredweights of 100 lb. each, the weight of all containers and packing being excluded. |
| Doz. | Number of dozens. |
| Doz. Pr.) Dz. Pr.) | Number of pairs in dozens. |
| Ft. | Length in linear feet. |
| Gal. | Volume in Canadian gallons (1 U.S. gal. = 0.83 Can. gal.). |
| Gross | Number in gross. |
| Hardwood | Wood from broad-leaved trees. |
| Kg. | Weight in kilograms (1 Kg. = 2.2 lb.). |
| Lb. | Weight in pounds. |
| Lb. N. | For canned foods, weight of contents of cans in pounds, the weight of all containers and packing being excluded. |
| M. | Number in thousands. |
| M. B. Ft.) M. B. F.) | Volume in thousand board feet. |
| M. Cu. Ft.) M. C. F.) ... | Volume in thousand cubic feet. |
| M. Kw. H. | Thousand kilowatt hours. |

| | |
|-------------------------|---|
| Narrow woven ... | Not more than 12 inches in width. |
| N. E. S. | Not elsewhere specified. |
| No. | Number. |
| Oz. | Weight in ounces. |
| Pack | Number of packs. |
| Pair | Number of pairs. |
| P. Gal. | Volume of alcoholic content in terms of Canadian gallons of the strength of proof (1 U.S. P.gal. = 0.74 Can. P.gal.). |
| Pkg. | Number of packages. |
| Softwood | Wood from coniferous trees. |
| Sq. Ft. | Area in square feet. |
| Sq. Ft. 3/8" equiv.) | Volume in square feet of 3/8" thickness, other thicknesses to be converted to the equivalent of 3/8" thickness (e.g. 10,000 sq.ft. of 3/16" plywood = 5,000 sq.ft. of 3/8" equivalent). |
|) | |
| SF3/8) | |
| Sq. Yd. | Area in square yards. |
| Ton | Weight in short tons of 2,000 lb. each: 1 long ton = 1.12 short tons or 2,240 lb. 1 metric ton = 1.1 short tons or 2,205 lb. |
| Tr. Oz. | Weight in troy ounces. |
| - | In Unit of Quantity Column: no quantity recorded. |
| □ | Precedes each class description card to distinguish class descriptions from rulings. |
| # | Statistics on this class not available except to employees of the Dominion Bureau of Statistics. |

UNITS OF QUANTITY USED IN THE FRENCH CLASS DESCRIPTIONS

| | |
|-------------|---|
| BRL | Volume en barils. |
| CARAT | Poids en carats. |
| CORDE | Volume en cordes. |
| DOUZ | Nombre de douzaines. |
| D PRE | Nombre de douzaines de paires. |
| GALL | Volume en gallons canadiens. |
| GAL P | Volume du contenu alcoolisé en gallons canadiens de preuve. |
| GR | Nombre de grosses. |
| KILO | Poids en kilomètres. |
| LIV | Poids en livres. |
| LIV N | Poids du contenu en livres (récipients exclus). |
| M | Nombre en milliers. |
| M KWH | Milliers de kilowatts-heure. |
| M PCU | Volume en milliers de pieds cubes. |
| M P P | Volume en milliers de pieds planche. |
| NOMB | Nombre. |
| ONCE | Poids en onces. |
| ON TR | Poids en onces troy. |
| PAQ | Nombre de paquets. |
| PAIRE | Nombre de paires. |
| PC3/8 | Volume en pieds carrés de 3/8 de pouce d'épaisseur. |
| PI | Longueur en pieds linéaires. |
| PI CA | Superficie en pieds carrés. |

UNITS OF QUANTITY USED IN THE FRENCH CLASS DESCRIPTIONS (Concluded)

| | |
|-------------|---|
| QTL | Nombre en quintal en poids de 100 livres. |
| QTL N | Poids du contenu en quintal de 100 livres (récipients exclus). |
| TONNE | Poids en tonnes courtes de 2,000 livres. |
| VG CA | Superficie en verges carrées. |
